PROFESSIONAL SUMMARY

AI Automation Developer with a Full-Stack background, specializing in end-to-end automation pipelines, Telegram bots, and AI-powered integrations. Experienced with n8n, OpenAI API, AssemblyAI, and webhook-based architectures to build production-ready systems that reduce manual work and deliver measurable business outcomes. Designed and deployed AI automation systems from idea to production.

TECH STACK

Automation / AI	n8n ◦ OpenAI API (GPT-4o-mini) ◦ AssemblyAI ◦ DALL-E 3 ◦ Telegram Bot API Telegraf ◦ AI Pipelines ◦ Prompt Engineering
Frontend	HTML5 ◦ CSS3 ◦ React.js ◦Three.js ◦ Responsive Web Design
Backend	Express.js ◦ REST API ◦ Webhooks ◦ JWT Auth ◦ Event-driven Architecture SaaS ◦ Backend
Databases	PostgreSQL ◦ Supabase ◦ Prisma ORM ◦ MongoDB ◦ Google Sheets API
Tools	Git ◦ GitHub ◦ GitHub Pages ◦ Google Sheets API ◦ Webhooks Postman ◦ Tilda
Skills	API Integration ◦ Automation Workflow Design ◦ Bot Development ◦ Pipeline Architecture ◦ Data Modeling ◦ User Behavior Modeling ◦ CRM System Design Usage-based Logic

PROJECT EXPERIENCE

APTO — AI-Powered Call Analytics Automation System

2026 https://tetiana-a.github.io/aiAutomationDev/

- Designed end-to-end AI automation pipeline for processing and analyzing 100+ sales calls/week
- Automated full workflow: audio upload → speech-to-text → AI sentiment & quality analysis → structured report delivery via Telegram
- Eliminated manual call review — ≈90% reduction in processing time for sales managers
- Implemented event-driven, webhook-based n8n architecture integrating 5 external services
- **Result:** Managers receive instant data-driven call summaries; zero manual listening required

Architecture: *Telegram → n8n → AssemblyAI (STT) → OpenAI GPT-4o-mini → Google Sheets → Telegram*

Tools: n8n · AssemblyAI · OpenAI API (GPT-4o-mini) · Telegram Bot API · Google Sheets API

WealthMirror AI — AI Automation for Financial Decision Analysis

2026 https://github.com/tetiana-a/wealthmirror-ai https://t.me/sass88888888_bot

- Built production AI automation SaaS for real-time financial decision analysis delivered via Telegram
- Designed webhook-based backend automating full pipeline: user input → OpenAI analysis → structured output → database
- Implemented user behavior modeling (Financial DNA) and usage-based SaaS logic (limits, monetization)
- Deployed scalable system on Render with PostgreSQL (Supabase) via Prisma ORM
- **Result:** Fully automated financial advisor flow — from user query to AI-generated structured insight

Architecture: *Telegram → Express Webhook → OpenAI API → PostgreSQL (Prisma/Supabase) → Response*

Tools: Node.js · TypeScript · OpenAI API · Telegraf · PostgreSQL · Prisma · Supabase · Render

AI CRM — AI Automation CRM System with Telegram Integration
2026 https://ai-crm-sage.vercel.app https://t.me/ai_crm13007_bot https://github.com/tetiana-a/ai-crm

- Developed AI-driven CRM system automating client and appointment management end-to-end
- Integrated Telegram bot as natural-language automation interface — users manage records via AI commands
- Built REST API backend (Node.js/Express) with JWT authentication and PostgreSQL via Prisma ORM
- Designed hybrid architecture: React dashboard UI + AI automation layer synced via webhooks
- **Result:** Eliminated manual CRM data entry — all client/appointment flows handled via AI commands

  Architecture: *React Dashboard + Telegram Bot → Express API → OpenAI → PostgreSQL (Prisma) → Webhook sync*

Tools: React.js · Node.js · Express.js · PostgreSQL · Supabase · Prisma · OpenAI API · Telegram Bot API · JWT · Webhooks

LegisFlow — AI Agent for Legal Document Analysis
2026 https://legisflow-ai.vercel.app https://t.me/legisflow_workflow_bot https://github.com/tetianaa/LegisFlow

- Built Telegram bot and web interface for automated legal document analysis — accepts PDF, extracts text, detects risks
- Designed automated n8n workflow: PDF upload → text extraction → chunking → GPT-4o analysis → structured risk report
- Implemented chunking logic for large documents and structured JSON output with compliance recommendations
- Deployed web interface on Vercel with full Telegram Bot API integration via n8n
- **Result:** Lawyers and non-legal users get instant AI-generated risk reports from any contract — no manual review needed

  Architecture: *Telegram → n8n Workflow → PDF Processing → OpenAI GPT-4o (chunking) → Structured Report → Telegram / Web*

  Tools: n8n · OpenAI GPT-4o · Telegram Bot API · JavaScript · Vercel

WORK EXPERIENCE

Full-Stack Developer
2023 – 2025

Delivered production web applications across **Real Estate & Construction** and **e-commerce** industries — full cycle from requirements to deployment:

▪ **Eco Italia** https://shopecoitaly.housefixbrno.cz/ full-stack React + Node.js online shop with product catalog, cart, checkout, admin panel and email notifications. Deployed on Railway with custom domain. [https://github.com/tetiana-a/eco-italia]

▪ **HouseFixBrno** https://housefixbrno.cz/— business website for a construction company. End-to-end: client communication, design, frontend & backend development, testing and deployment. https://github.com/tetiana-a/fixhouse-brno

▪ Built landing pages, multi-page sites and portfolio sites; integrated contact forms, product catalogs and basic CMS functionality

Stack: HTML5 · CSS3 · JavaScript · React.js · Node.js · Express · REST API · Three.js · Git · GitHub Pages · Railway · Tilda · WordPress
