PROFESSIONAL SUMMARY

AI Automation Developer with a Full-Stack background, specializing in end-to-end automation pipelines, Telegram bots, and AI-powered integrations. Experienced with n8n, OpenAI API, AssemblyAI, and webhook-based architectures to build production-ready systems that reduce manual work and deliver measurable business outcomes. Designed and deployed AI automation systems from idea to production.

TECH STACK

Automation / AI	n8n • OpenAI API (GPT-4o-mini) • AssemblyAI • DALL-E 3 • Telegram Bot API Telegraf • AI Pipelines • Prompt Engineering
Frontend	HTML5 • CSS3 • React.js • Three.js • Responsive Web Design
Backend	Express.js • REST API • Webhooks • JWT Auth • Event-driven Architecture SaaS • Backend
Databases	PostgreSQL • Supabase • Prisma ORM • MongoDB • Google Sheets API
Tools	Git • GitHub • GitHub Pages • Google Sheets API • Webhooks Postman • Tilda
Skills	API Integration • Automation Workflow Design • Bot Development • Pipeline Architecture • Data Modeling • User Behavior Modeling • CRM System Design Usage-based Logic

WORK EXPERIENCE

AI Automation Engineer

HAPP (Freelance / Contract)

Apr 2026 – Jun 2026

- Designed and developed AI-powered workflows using n8n.
 - Built AI voice assistants and Telegram AI bots for customer communication.
 - Integrated OpenAI API, REST APIs, webhooks, CRM systems and Google Sheets.
 - Automated lead qualification, customer support and business workflows.
 - Implemented prompt engineering and optimized AI workflows for production use.
 - Collaborated on deploying AI automation solutions that reduced manual work and improved operational efficiency.
- Technologies: n8n • OpenAI API • Telegram Bot API • REST API • Webhooks • Google Sheets • CRM • JSON • Prompt Engineering • AI Agents

Full-Stack Developer

2023 – 2025

Delivered production web applications across **Real Estate & Construction** and **e-commerce** industries — full cycle from requirements to deployment:

- **Eco Italia** <https://shopecoitaly.housefixbrno.cz/> full-stack React + Node.js online shop with product catalog, cart, checkout, admin panel and email notifications. Deployed on Railway with custom domain. [<https://github.com/tetiana-a/eco-italia>]
- **HouseFixBrno** <https://housefixbrno.cz/> — business website for a construction company. End-to-end: client communication, design, frontend & backend development, testing and deployment. <https://github.com/tetiana-a/fixhouse-brno>
- Built landing pages, multi-page sites and portfolio sites; integrated contact forms, product catalogs and basic CMS functionality

Stack: HTML5 • CSS3 • JavaScript • React.js • Node.js • Express • REST API • Three.js • Git • GitHub Pages • Railway • Tilda • WordPress

PROJECT EXPERIENCE

APTO — AI-Powered Call Analytics Automation System

2026 <https://tetiana-a.github.io/aiAutomationDev/>

- Designed end-to-end AI automation pipeline for processing and analyzing 100+ sales calls/week
 - Automated full workflow: audio upload → speech-to-text → AI sentiment & quality analysis → structured report delivery via Telegram
 - Eliminated manual call review — ≈90% reduction in processing time for sales managers
 - Implemented event-driven, webhook-based n8n architecture integrating 5 external services
 - **Result:** Managers receive instant data-driven call summaries; zero manual listening required
- Architecture:* Telegram → n8n → AssemblyAI (STT) → OpenAI GPT-4o-mini → Google Sheets → Telegram
- Tools:** n8n · AssemblyAI · OpenAI API (GPT-4o-mini) · Telegram Bot API · Google Sheets API

WealthMirror AI — AI Automation for Financial Decision Analysis

2026 <https://github.com/tetiana-a/wealthmirror-ai> https://t.me/sass88888888_bot

- Built production AI automation SaaS for real-time financial decision analysis delivered via Telegram
 - Designed webhook-based backend automating full pipeline: user input → OpenAI analysis → structured output → database
 - Implemented user behavior modeling (Financial DNA) and usage-based SaaS logic (limits, monetization)
 - Deployed scalable system on Render with PostgreSQL (Supabase) via Prisma ORM
 - **Result:** Fully automated financial advisor flow — from user query to AI-generated structured insight
- Architecture:* Telegram → Express Webhook → OpenAI API → PostgreSQL (Prisma/Supabase) → Response
- Tools:** Node.js · TypeScript · OpenAI API · Telegraf · PostgreSQL · Prisma · Supabase · Render

AI CRM — AI Automation CRM System with Telegram Integration

2026 <https://ai-crm-sage.vercel.app> https://t.me/ai_crm13007_bot <https://github.com/tetiana-a/ai-crm>

- Developed AI-driven CRM system automating client and appointment management end-to-end
 - Integrated Telegram bot as natural-language automation interface — users manage records via AI commands
 - Built REST API backend (Node.js/Express) with JWT authentication and PostgreSQL via Prisma ORM
 - Designed hybrid architecture: React dashboard UI + AI automation layer synced via webhooks
 - **Result:** Eliminated manual CRM data entry — all client/appointment flows handled via AI commands
- Architecture:* React Dashboard + Telegram Bot → Express API → OpenAI → PostgreSQL (Prisma) → Webhook sync

Tools: React.js · Node.js · Express.js · PostgreSQL · Supabase · Prisma · OpenAI API · Telegram Bot API · JWT · Webhooks

LegisFlow — AI Agent for Legal Document Analysis

2026 <https://legisflow-ai.vercel.app> https://t.me/legisflow_workflow_bot <https://github.com/tetiana/LegisFlow>

- Built Telegram bot and web interface for automated legal document analysis — accepts PDF, extracts text, detects risks
 - Designed automated n8n workflow: PDF upload → text extraction → chunking → GPT-4o analysis → structured risk report
 - Implemented chunking logic for large documents and structured JSON output with compliance recommendations
 - Deployed web interface on Vercel with full Telegram Bot API integration via n8n
 - **Result:** Lawyers and non-legal users get instant AI-generated risk reports from any contract — no manual review needed
- Architecture:* Telegram → n8n Workflow → PDF Processing → OpenAI GPT-4o (chunking) → Structured Report → Telegram / Web
- Tools:** n8n · OpenAI GPT-4o · Telegram Bot API · JavaScript · Vercel
